DETAIL 1—BALED AND BURLAPPED, AND CONTAINER PLANTS

NOTES:
1. When a minimum of a plant bed extends into an area greater than 100% of the root area, the extent of the root area shall be noted only when the root area exceeds the bed area. No area shall be noted when the root area is less than the bed area.
2. In areas where bed or fill is used, existing grass and weed growth shall be trimmed to a maximum 20 mm (1") in height by initial.
3. When bare root plants are used, soil shall be filled to conform to detail 2.

GENERAL NOTES:
1. The diameter of all plant pit shall be at least 3 or 3 times greater than the ball diameter. For bare root plants, see standard specification G-2.5.5. Locates the rootball on fill soil, and not loose fill.
2. The pit depth shall comply with the requirement of the standard specification G-2.5.5. Planting.
3. Mulch shall be applied around the entire area of the plant. Mulch shall be filled with the topsoil around the roots. The topsoil shall be filled with the topsoil around the roots. Loosen the soil.
4. Loose fill with native soil, unless considered unsuitable, in that case fill with good quality topsoil.
5. The entire area of the planting pit shall be graded so that the maximum slope does not exceed 1:3 in any direction.
6. For the most efficient use of material, construct an area around the ball to 100 mm (4") high around the root system. The area will collect in the recesses and move slowly into the planting hole. Any root will be minimized.
7. Trees shall not be planted within the clear zone.
8. Loose fill, topsoil, mulch, and plants will be considered a subsidiary obligation.
9. The contract unit price for each of the particular plant items consists of the standard specification G-2.5.5. Planting. The unit price will be filled with the topsoil around the roots. Loosen the soil.
10. All dimensions shown in kilometers unless otherwise specified.

DETAIL 2—BARE ROOT PLANTS

NOTES:
1. Place roots in natural growing position, carefully wrap top we around roots. Saw the topsoil around the roots until it is completely saturated.
